Before you get too excited, you'll need a few things first: a song storage device, an Internet connection, and a Spotify Premium subscription. Spotify Prerequisites is a little picky about what it allows you to download on some devices, so here's a quick summary: On a desktop, you can save your favorite songs to playlists for offline listening, but — unlike mobile - albums and playlists are out of the equation. Desktop How to download favorite songs on the desktop Downloading your entire catalog of favorite songs on your PC couldn't be easier – just open Spotify's Favorite Songs section (using the Spotify app for MacOS or Windows) and swipe down the Download switch. (If you do not do this, the download option remains hidden.) Step 2: Next, toggle the Download slider in the upper-right corner of each playlist. The playlist will start downloading, but keep in mind that it may take some time depending on the size of the playlist and the speed of your Internet connection. Once saved, the playlist will be accessible from the Playlists section on the left side of the Spotify app for MacOS and Windows, along with all your other playlists (even those that haven't been downloaded for offline listening). Mobile How to download favorite songs, album or playlist on a mobile device Whether you're downloading the playlist of favorite songs, album or playlist, the procedure is the same across the board.
